P R O J E C T S

IMPROVING DATA LEAKAGE IN PUBLIC CLOUD (2021-22)

Contributed to Java-based system development for cloud data leakage prevention and detection, implementing crucial features and algorithms to ensure robust data security.

EARLY DETECTION OF CHRONIC KIDNEY DISEASE (2022)

Our team spearheaded the development of a cutting-edge project targeting rapid identification of chronic kidney disease in patients at an early stage, ensuring timely intervention and treatment.

LOOK BASED MEDIA PLAYER - LOOKALIVE (2022-23)

Our accomplished team created an innovative video player featuring advanced facial recognition technology, enabling seamless automatic play/pause functionality based on human faces.
